For developing our un-skilled human resources to skilled manpower we have established a modern Technical Training Centre. In the centre we introduced two types training program which are - Up-grading Training Course for non- institutional trained & experienced workers and Fresher Training Course to full fill the needs of our valued foreign employers as well as the local industries. We send our trained Candidates to the respective industries for practical orientation .After gaining some practical experience Fresher also become up-to the mark for foreign employment. In the training centre following training courses have been developed matching with the needs of local and Foreign employment market:-

The background image shows the interior of a large, industrial-style building, likely the Mahabul Training Academy. It features a high ceiling with exposed metal beams and a corrugated metal roof. Large windows on the left side allow natural light to enter. In the background, there are several colorful posters or charts on the wall, and some equipment or materials are visible on the floor. The overall atmosphere is that of a functional training or workshop space.

MAHABUL TRAINING ACADEMY

Mahabul Training Center was established for the Skills development of human resources and offers a wide range of training services to prospective candidates for overseas and local employment, along with different language courses.

The center is to ensure the candidates are aware of the job requirements with basic and advanced skills necessary for successful employment at home and abroad. After successful completion of the candidates training, they are provided with the certificates.
